SOCIETY OF WOMEN IN UROLOGY
*Professional Development &
Clinical Mentoring*

3RD ANNUAL WINTER MEETING
January 24 – 26, 2014

JW Marriott Camelback
Scottsdale, Arizona

Dear Colleagues,

Jennifer Dodson,
MD, PhD

We welcome all of you to the 3rd Annual Society of Women in Urology Winter Meeting: Clinical Mentoring and Professional Development. This year's gathering focuses on voiding dysfunction across the lifespan, challenges in the management of prostate cancer and mentorship in clinical practice and career pathways. A distinguished all-female faculty will lead the didactics, hands-on sessions and panel discussions. The voiding dysfunction session includes management of dysfunctional elimination syndrome in children and the life-long urological needs of adults with congenital urological conditions. Included will be an update on new treatments for medication refractory overactive bladder, and current therapeutic strategies for the management of benign prostatic hyperplasia. An interactive panel will discuss recurrent urinary tract infections in urology. Attendees will also have the opportunity to participate in a hands-on labs for sacral neuromodulation botulinum toxin therapy and BPH.

Melissa Kaufman,
MD, PhD

Saturday brings presentations on the current challenges in prostate cancer management, followed by a special session

on new developments in hormone refractory prostate cancer. Mentorship is a particular forte of the SWIU, and a focus of this meeting. We are again looking forward to the panel

discussion from women executives in the medical industry who will share their experiences with the group. An interactive discussion will explore different career pathways in urology including private practice and academics and culminate with a session providing practical advice on managing finances of a practice.

A focal point of this year's meeting is the Saturday night banquet with keynote speaker Catherine deVries, MD, FACS, FAAP, an international leader in urology, and 2002 past president of SWIU. Please join us for Sunday Brunch with the Experts where many of the speakers and panelists will be available to informally discuss your questions while all enjoy the wonderful hospitality of the Camelback Inn. Thank you for attending the 3rd Annual Winter meeting!

Jennifer L. Dodson, MD, PhD
SWIU President

Melissa R. Kaufman, MD, PhD
Winter Meeting Program Chair and SWIU Past President

Mission Statement

The Society of Women in Urology, Inc., consists of urologic surgeons and other outstanding contributors to the progress of SWIU who reside and practice their profession in the United States and internationally. The purpose of SWIU is to support the professional advancement of women urologists, to encourage public education regarding urologic issues and to promote urologic research.

Disclaimer Statement

Statements, opinions and results of studies contained in the program are those of the presenters/authors and do not reflect the policy or position of the SWIU nor does the SWIU provide any warranty as to their accuracy or reliability.

Filming/Photography Statement

No attendee/visitor at the SWIU 2014 Clinical Mentoring Conference may record, film, tape, photograph, interview or use any other such media during any presentation, display or exhibit without the express, advance approval of the SWIU Executive Director. This policy applies to all SWIU members, non-members, guests and exhibitors, as well as members of the print, online or broadcast media.

Educational Needs

Care of the urologic patient is becoming increasingly complex. The pace of research and new innovations is accelerating across all the sub-specialties of urology. As a consequence, it is critically important that those involved in urologic patient care stay abreast of recent developments across all of urology's divergent disciplines.

Dysfunctional Elimination Syndrome (DES), a diagnosis of exclusion, is a recognizable term for pediatric patients who have bladder and bowel dysfunction with no neurological etiology. Treatment options typically start with behavioral therapy, which includes timed and double voiding, avoidance of dietary bladder irritants and aggressive treatment for constipation. While these measures may relieve symptoms in some patients, most proceed to some form of medical treatment, mostly anticholinergic therapy. Evidence-based recommendations will assist urologists in gaining knowledge of treatment strategies for these patients.

Adults with congenital chronic conditions have long recognized the need for a system that facilitates the transfer from pediatric to adult care. As more children with chronic urological disease survive well into adulthood, we increasingly need an adequate system to address their continuing urological needs. Optimal chronic condition management for adults with congenital urological disease requires medical knowledge of the pediatric urological disease and potential sequelae from treatment interventions. This session will present pragmatic information to incorporate this underserved population in an appropriate environment.

Overactive Bladder (OAB) remains a remarkably common urologic condition resulting in significant clinical and economic sequelae. Although likely underestimated, the overall prevalence of overactive bladder is projected to be between 15 and 38 percent. The mainstay of therapy for decades has revolved around anticholinergic pharmaceuticals. However, recent advances in bladder and urothelial physiology have dramatically expanded the treatment options available for OAB management. There are several emerging options for OAB therapy and often conflicting literature regarding these therapies. Despite substantial investment into OAB treatment, we are witness to the genesis of research on detrusor function and urothelial biology that will guide practitioner interventions in the coming decades. Immense opportunity exists for future evaluation of OAB pathophysiology to advance our knowledge regarding management of this multifactorial urologic disorder. As knowledge of these approaches may be incomplete for some practitioners, evidence-based literature will be reviewed to close this physician gap.

Benign Prostatic Hyperplasia (BPH) is a remarkably prevalent and slowly progressive condition accounting for significant lower urinary tract symptoms in men. Management guidelines have been vague with regards to appropriate tailoring of medical versus surgical approaches to prevent subsequent detrusor dysfunction. Current evidence on the comparative effectiveness of different agents/strategies has improved and this growing evidence base is assisting clinicians in identifying risk factors that are associated with disease progression. This session will review therapeutic strategies for BPH management, including consideration of utilization of healthcare services and cost-effective management options.

EDUCATIONAL NEEDS, OBJECTIVES AND CME ACCREDITATION STATEMENTS

SWIU

Urinary Tract Infections (UTI) are among the most frequent bacterial infections in the community and healthcare setting. In complicated UTI treatment, success depends mainly on the possibility to eliminate or remediate complicating risk factors. Use of topical estrogen therapies, antibiotic prophylaxis and utilization of supplements are complex therapeutic decisions for many urologists. This session will review complex UTI diagnosis and current evidence-based strategies for treatment.

Prostate Cancer remains a prevalent, costly and important health problem in men. Goals of the American Urological Association guidelines, in addition to discussing the management and treatment of patients with prostate cancer, are designed to help clinicians understand the evidence for using the PSA test to evaluate men at risk for Prostate Cancer and provide guidance about how to discuss the risks and benefits of early detection with patients. Additionally, this session will address treatment strategies for early stage disease, including appropriate selection of patients for active surveillance.

As a direct result of the significant increase in FDA-approved therapeutic agents for use in patients with metastatic Castration Resistant Prostate Cancer (CRPC), clinicians are challenged with a multitude of treatment options and potential sequencing of these agents that, consequently, make clinical decision-making exceedingly complicated. Given the rapidly evolving nature of this field, many complex factors, including the individual patient's preferences and personal goals should be considered when choosing management strategies. This session will review current AUA Guideline statements for CRPC created to inform clinicians on the appropriate use of observation, androgen-deprivation and anti-androgen therapy, androgen synthesis inhibitors, immunotherapy, radionuclide therapy, systemic chemotherapy, palliative care and bone health, which represent the most common scenarios encountered in clinical practice.

Navigating the complexities of the recently implemented Affordable Care Act and Accountable Care Organizations (ACOs) represent a new paradigm in healthcare payment reform. How these changes may impact urology practice is a topic of exceptional interest to many women in urology. Indeed, women in urology continue to face obstacles and unique challenges, which differ from those of our male colleagues. Understanding these gender implications with regards to academic practice will assist participants in developing strategies for career advancement.

Cost control is becoming increasingly important in healthcare worldwide. Although physicians should accept the limitation of resources and take responsibility to improve their clinical cost-reimbursement ratio, the training to understand the salient features of their own practice utilization is often lacking. To achieve this, urologists will need basic education in clinic management to control and adjust costs and reimbursement, without impacting professional quality of care. Rational use of diagnostics and therapy should be implemented and frequently verified. Physicians are in a unique situation as professionals that are able to integrate economics with health care. Comprehension of how recently implemented national agendas, such as the Affordable Care Act (ACA), will additionally be considered.

Objectives

At the conclusion of the meeting, attendees should be able to:

1. Review current diagnosis and treatment strategies for children with voiding dysfunction.
2. Review obstacles to providing appropriate care for adults with congenital conditions and provide strategies for effective transition of care.
3. Review recent guidelines from the American Urological Association for Benign Prostatic Hyperplasia.
4. Review recent evidence and guidelines with a panel of experts for diagnosis and management of recurrent Urinary Tract Infections.
5. Describe current evidence-based recommendations for the evaluation and management of patients with Overactive Bladder.
6. Identify differing approaches across a panel of experts on the management of controversial problems in the management of Prostate Cancer patients.
7. Describe differing approaches across a range of disciplines on the management of complex advanced Prostate Cancer.
8. Identify resources for career development in both private and academic urology practice.
9. Describe challenges in the contemporary management of practice finances, including the impact of the Affordable Care Act.

Accreditation Statement

This activity has been planned and implemented in accordance with the Essential Areas and policies of the Accreditation Council for Continuing Medical Education through the joint sponsorship of the American College of Legal Medicine and the Society of Women in Urology, Inc. The American College of Legal Medicine is accredited by the ACCME to provide continuing medical education for physicians.

The American College of Legal Medicine designates this live activity for a maximum of **11.00 AMA PRA Category 1 Credits™**. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Conflict Resolution Statement

The American College of Legal Medicine CME Office has reviewed this activity's speaker and planner disclosures and resolved all identified conflicts of interest, if applicable.

General Disclaimer

The statements and opinions contained in this program are solely those of the individual authors and contributors and not of the Society of Women in Urology. The appearance of the advertisements is not a warranty, endorsement or approval of the products or services advertised or of their effectiveness, quality or safety. The content of this publication may contain discussion of off-label uses of some of the agents mentioned. Please consult the prescribing information for full disclosure of approved uses. The Society of Women in Urology disclaims responsibility for any injury to persons or property resulting from any ideas or products referred to in the abstracts or advertisements.

Janice L. Arnold, MD

Janice Lee Arnold, MD, is a board certified urologist with years of practice in the Northern Virginia and Washington, DC area. She received a BS degree in Biology and graduated with honors from the Illinois Institute of Technology. She attended medical school at the University of Chicago Pritzker School of Medicine and completed her residency at the University of Chicago Hospitals and Clinics where she was Chief Resident. Dr. Arnold has served on the National Advisory Panel for Prostate Cancer for the American Cancer Society at its national office in Atlanta, Georgia, and has served as Chairman of the Department of Urology at Reston Hospital Center. She is on the Cancer

Committee there also. She served on the Loudoun County Board of Directors of the American Cancer Society, the Board of Directors for the Northern Virginia Medical Society and the National Society of Women in Urology. Dr. Arnold's area of expertise is lower urinary tract disorders involving the prostate and urinary bladder. She is one of the area's leading specialists in the treatment of urinary incontinence. She has been featured on a nationally televised prostate cancer special, "Prostate Cancer: Are you at Risk" with General Colin Powell and Senator Robert Dole. She has also appeared at the United States Capitol as a guest speaker to help raise awareness and promote research funding of prostate cancer.

Dr. Arnold is often an invited speaker at various metropolitan DC community activities to educate the public about this disease. She was featured in the January 3, 2002 *Washington Post* Newspaper for years of volunteer service with the local chapter of the American Cancer Society to promote awareness and early detection of prostate cancer. Dr. Arnold is the recipient of the 2002 distinguished "Best of Reston" award for Outstanding Community Service in the area of prostate cancer awareness and screening. She received the first ever SWIU-Pfizer Award for community service in men's health in May 2004 at the annual American Urological Association meeting in San Francisco, California.

Dr. Arnold served as the president of the Society of Women in Urology (2003 – 2004) and was on the Advisory Council for the National Association for Continence (2005 – 2006). The American Board of Urology has asked her to serve for four years on the Advisory Council at the National Institutes of Health; an appointment confirmed by the Department of Health and Human Services and the President of the United States. Her service was from 2004 through 2008.

Dr. Arnold was voted by her physician peers as one of the Washingtonian "Top Doctors," one of "America's Top Urologists" and most recently, one of the prestigious "2011 Super Doctors" in Baltimore, DC and Northern Virginia.

Tamara G. Bavedam, MD

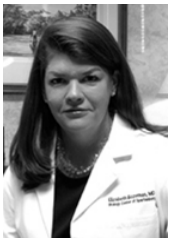

Tamara G. Bavedam, MD, is currently the program director of Women's Urologic Health at the National Institutes of Health in Bethesda, Maryland. She supports clinical and translational research projects related to the normal and abnormal function of the lower urinary tract. This includes research studies in both children and adults of the etiology, diagnosis, treatment and prevention of such clinical disorders as urinary incontinence, interstitial cystitis, overactive bladder and urinary tract infections, including acute and chronic cystitis.

Dr. Bavedam received her MD from the University of Iowa College of Medicine where she also completed a residency in urology. She then went on to complete a fellowship in female urology at Kaiser Permanente in Los Angeles, California. She has held various teaching positions as an assistant and associate professor at the University of Washington and MCP-Hahnemann University (now Drexel) in Philadelphia, Pennsylvania. She recently received her MS in Pharmaceutical Medicine from Hibernia College in Dublin, Ireland.

Teresa D. Beam, MD

Dr. Beam was born in Noblesville, Indiana. She is a graduate of Indiana University and Purdue University School of Science. She earned her medical degree from the University of Cincinnati College of Medicine in Cincinnati, Ohio. She completed her general surgery and urology residency at University of Cincinnati Medical Center in Cincinnati, Ohio.

Dr. Beam is certified by the American Board of Urology. She is the current president of the Indiana Urologic Association, and a member of the American Medical Association, the American Urological Association and the Society of Women in Urology. Her areas of special interest include female urologic conditions, kidney stones and interstitial cystitis.

Elizabeth W. Bozeman, MD

Elizabeth W. Bozeman, MD, has been practicing medicine for 15 years and is a urology specialist in the Spartanburg Regional Healthcare System in South Carolina. Dr. Bozeman received her undergraduate degree from Emory University before attending the Medical University of South Carolina in Charleston where she received her medical degree. She completed an internship in general surgery and a residency in urology, both at the Medical University of South Carolina.

Dr. Bozeman's special areas of interest include general urology, female urology with emphasis on incontinence and completed UTI's, kidney stones, kidney and bladder cancer, interstitial cystitis and enuresis.

Joanna K. Chon, MD

Dr. Joanna K. Chon started her career in academics at the Thomas Jefferson University in Philadelphia as an assistant professor of urology. She graduated from the University of Pennsylvania with a degree in Bioengineering and went on to receive her medical degree at the George Washington University. She completed a residency at the University of Maryland and then completed a fellowship in female urology, urodynamics and pelvic floor reconstruction with Dr. Gary Leach, in Los Angeles at the Cedars Sinai Medical Center. She was in private practice in Philadelphia for seven years and recently relocated to Naples, Florida in 2012.

Catherine R. deVries, MD, FACS, FAAP

Dr. Catherine deVries is professor of surgery (urology) and associate professor of family medicine (public health) at the University of Utah School of Medicine. She is the Director of the Center for Global Surgery. A graduate of Harvard University, she holds a Masters in pathology from Duke University and an MD from Stanford University. She trained in urology at Stanford University with fellowships in pediatric urology at University of California, San Diego.

While pediatric urology is her clinical focus within the US, she has been intensively active in the development of sustainable global surgery since 1992. In 1994, she founded International Volunteers in Urology (now IVUmed) and continues as its president. IVUmed is dedicated to urological education worldwide and focuses on training doctors and nurses in developing countries. Dr. deVries has developed urological training programs in Asia, Africa and Latin America and is on the Board of Chairmen of the Societe Internationale d'Urologie (SIU). She teaches courses in surgery and public health and in engineering innovation for the developing world at the University of Utah and at Stanford University. She has recently completed a book, [Global Surgery and Public Health: A New Paradigm](#).

Dr. deVries' awards include the Society of Urodynamics, Female Pelvic Medicine and Urogenital Reconstruction Distinguished Service 2013, American College of Surgeons' Surgical Humanitarian 2012, the American Red Cross International Award, Utah Chapter 2011, American Urological Association's Distinguished Contribution Award 2009, The Southeastern Section AUA Presidential Lectureship 2009, The American Urological Association's Honorary Member 2007 and the American Medical Association's Dr. Nathan Davis International Award in Medicine 2006.

When not engaged in medical activities, she and her husband, Scott Lucas, run a small ranch at the base of the Uinta Mountains of Wyoming.

Jennifer L. Dodson, MD, PhD

Jennifer L. Dodson, MD, PhD, is an assistant professor in the Department of Urology at Johns Hopkins University School of Medicine in Baltimore, Maryland where she also serves on the associate faculty in the Welch Center for Prevention, Epidemiology and Clinical Research. In addition to her teaching positions, Dr. Dodson is also a member of the consulting staff at the Kennedy Krieger Institute in Baltimore.

Dr. Dodson received her undergraduate degree from Columbia University in New York, after which she went on to receive her MD from the University of Wisconsin School of Medicine and later, her PhD from Johns Hopkins University School of Public Health.

Dr. Dodson is the current president of SWIU and is a Medical Advisory Board Member for the National Kidney Foundation of Maryland.

Melissa R. Kaufman, MD, PhD

Dr. Melissa Kaufman is assistant professor of urologic surgery at Vanderbilt Medical Center and chief of urology at the Veteran's Administration Hospital in Nashville. She received her BA from Washington University – St. Louis and PhD in Microbial Genetics at University of Tennessee. Following postdoctoral research at Stanford and completion of medical school in her home state of Arkansas, Dr. Kaufman commenced her urology residency at Vanderbilt in 2002. She completed fellowship training in both male reconstruction and female pelvic medicine and reconstructive surgery in 2009 at Vanderbilt. Her practice focuses on female and male voiding dysfunction and

incontinence, pelvic organ prolapse, neurourology, pediatric transition, urologic prosthetics, as well as reconstructive surgery for prostate cancer survivors, urogenital fistula and trauma. Dr. Kaufman has served on the SWIU Board of Directors since 2006 and is the immediate past president.

Una J. Lee, MD

Dr. Una Lee is a urologist in the Section of Urology at Virginia Mason Medical Center in Seattle, Washington, and an assistant clinical professor of urology at the University of Washington. She is originally from Troy, Ohio. Her undergraduate and medical school degrees are from Stanford University. She completed a urology residency at the Cleveland Clinic, and did her fellowship in pelvic medicine and reconstructive surgery at UCLA with Dr Shlomo Raz. She has a background in basic science research, training in the laboratories of Margot Damaser, PhD, and Firouz Daneshgari, MD, at the Cleveland Clinic and Larissa Rodriguez, MD, at UCLA. Dr. Lee's clinical practice

is focused on the evaluation and management of female pelvic floor disorders. She specializes in incontinence, pelvic organ prolapse and vaginal reconstructive surgery as well as robotic-assisted laparoscopic surgery for prolapse. She volunteers with the nonprofit organization Medicine for Humanity and travels to Mbarara, Uganda to partner with local providers and teach on issues of women's health including the surgical repair of childbirth injury. She is also a new investigator in translational research for female pelvic floor disorders and conducts collaborative research at the Benaroya Research Institute at Virginia Mason. Her ultimate goal is to provide excellent care for her patients by pursuing a deeper understanding of disease mechanisms and developing safe and effective prevention and treatment strategies.

Sarah E. McAchran, MD

Sarah E. McAchran, MD, is an assistant professor in the Department of Urology and the Department of Obstetrics and Gynecology at the University of Wisconsin. She attended undergraduate school at the University of Michigan before going on to receive her medical degree at Vanderbilt University School of Medicine. Dr. McAchran completed residencies in general surgery and urology at Case Western Reserve University in Cleveland, Ohio. She then completed a fellowship in female pelvic medicine and reconstructive surgery at the Glickman Urological Institute, Cleveland Clinic Foundation.

Dr. McAchran is a member of the American Urological Association, North Central Section of the AUA, American Association of Clinical Urologists, Society of Women in Urology, Society of Urodynamics, Female Pelvic Medicine and Urogenital Reconstruction, American Urogynecologic Society, Wisconsin Urological Society, International Continence Society and International Urogynecologic Association.

Courtenay K. Moore, MD

Courtenay K. Moore, MD, received her medical degree from Albany Medical College in New York, where she also completed her internship and residency. She completed a two-year fellowship in female pelvic medicine and reconstructive surgery at the Cleveland Clinic in Ohio. She was awarded the American Foundation for Urologic Disease Research Scholarship from 2005 to 2007. Dr. Moore is currently a joint staff member at the Cleveland Clinic Glickman Urological and Kidney Institute and the Institute of Obstetrics and Gynecology. She is associate professor in the Department of Surgery at the Cleveland Clinic Lerner College of Medicine of Case Western Reserve University and director of the Female Pelvic Medicine and Reconstructive Surgery Fellowship at the Cleveland Clinic. Dr. Moore received subspecialty certification in female pelvic medicine and reconstructive surgery in 2013. Her clinical interests include pelvic organ prolapse, incontinence, voiding dysfunction and female sexual dysfunction.

Alicia Morgans, MD

Alicia Morgans, MD, is an assistant professor in the Department of Medicine in the Division of Hematology/Oncology at Vanderbilt-Ingram Cancer Center, Vanderbilt University Medical Center. Dr. Morgans received her undergraduate degree from Ursinus College in Pennsylvania. She then went on to receive her medical degree from the University of Pennsylvania School of Medicine. She is currently a candidate to receive her master of public health, epidemiology track at the Vanderbilt School of Public Health in May of 2015. Dr. Morgans is a member of the American Society of Clinical Oncology.

Lee Sullivan

Lee Sullivan is the Vice President, Global Marketing of the Urology and Women's Health division of Boston Scientific. During her 24 years at BSC, Lee has strongly supported the Urology and Women's Health's mission "to be the partner of choice for innovative medical devices and efficient healthcare solutions that improve the quality of patient's lives". In her current role, Lee is responsible for leading the marketing efforts to design products and programs to meet the needs of urologists in treating their patients. Over the years, she has established strong working relationships with many of the world thought leaders in Urology and Women's Health. She leads and develops a team of over 30 marketing professionals. Prior to her marketing role, Lee led the U.S. Sales force, as Vice President, comprised of 220 sales managers.

Lee is passionate about the advancement and development of women in their careers. She has spoken at multiple women's leadership panels, including the Society for Gynecologic Surgeons, American Urogynecologic Society and Boston Scientific's Women's Forum. Lee teaches "Change Leadership" for the Boston Scientific Emerging Executives Leadership Program.

Lee holds a Bachelor of Science, Marketing from the University of Georgia. Lee is originally from Clemson, South Carolina and currently resides in Boston, Massachusetts with her husband, Scott and son, George.

Suzette E. Sutherland, MD

Suzette E. Sutherland, MD, serves as director of female urology at the University of Washington in Seattle. She completed her medical degree and urologic training at Case Western Reserve University School of Medicine/University Hospital of Cleveland in Cleveland, Ohio. Dr. Sutherland has gained further specialty training in female urology to include urinary incontinence and voiding dysfunction, urodynamics, neuromodulation, pelvic prolapse and reconstructive surgery, pelvic floor disorders and female sexual dysfunction from the Center for Continence Care and Female Urology in Minneapolis/St.

Paul, Minnesota, and from the Institute for Sexual Medicine in Boston. She has made numerous contributions to the medical literature in the form of presentations, papers and book chapters on urinary incontinence, pelvic prolapse and sexual health, and takes an active role in training future female urologists. Serving as a consultant for pharmaceutical and medical device companies, she provides her expertise and innovative ideas for the future development of female urology. Dr. Sutherland remains active in associated clinical research, staying abreast of the newest developments in her field, with the goal of being able to provide the most up-to-date treatment options for her patients.

Dr. Sutherland is an active member of the American Urologic Association, the North Central Section of the AUA, the Western Section of the AUA, the Northwestern Urology Society, the Minnesota Urologic Society (current past president 2012 – 2013), the Society for Women in Urology (current board member), the Society of Urodynamics, Female Pelvic Medicine and Urogenital Reconstruction (Practice Standards Committee 2012 – present; Awards Committee 2012 – present), the American Urogynecology Society, the International Continence Society, the International Urogynecology Association, the International Society for Pelvic Neuromodulation, and the International Society for the Study of Women's Sexual Health.

Stacy T. Tanaka, MD

Stacy T. Tanaka, MD, is an assistant professor of urologic surgery and pediatrics at Monroe Carell Jr. Children's Hospital at Vanderbilt. She is also a member of the active attending staff at Vanderbilt University Medical Center, Centennial Medical Center and Baptist Hospital. Her specialties are in both urology and pediatrics. Dr. Tanaka received her undergraduate degree from Princeton University, followed by her MS degree from the University of California, Berkeley, and later her medical degree from the University of California, Davis School of Medicine in Sacramento. She completed her internship in general surgery and pre-urology, then completed her residency in urology at

the University of California, Davis School of Medicine. She then completed a fellowship in pediatric urology at Monroe Carell Jr. Children's Hospital at Vanderbilt in Nashville, Tennessee.

Dr. Tanaka is a member of the American Urological Association, Society for Fetal Urology, Society for Pediatric Urology and Southeastern Section of the American Urological Association. She is a fellow of the American College of Surgeons and a specialty fellow of the American Academy of Pediatrics, Section on Urology.

Martha K. Terris, MD

Dr. Terris received her general surgery training at Duke University and urologic surgery training at Stanford University. Her urologic oncology fellowship training, also at Stanford, focused on prostate cancer diagnosis and staging. After completion of her training, she remained at Stanford as faculty member in the Department of Urology and chief of urology at the Palo Alto Veterans Affairs Medical Center. Dr. Terris joined the faculty at the Medical College of Georgia and the Augusta Veterans Affairs Medical Center in 2002. She was named 2003 – 2004 Georgia Cancer Coalition Distinguished Cancer Scholar. Dr. Terris assumed the position of program director for the Urology Residency Training Program in 2003 and served as president of the Society of Urology Chairs and Program Directors and is a member of the Residency Review Committee for Urology. In 2011, the Medical College of Georgia became Georgia Health Sciences University. With this evolution, Dr. Terris became the Witherington Chair of Urology.

Jannah Thompson, MD

Jannah Thompson, MD, received her medical degree from Michigan State University. She then went on to complete her internship and residency at the University of Buffalo, the State University of New York. Following this, she completed a fellowship a Metropolitan Urology in St. Paul, Minnesota, where she received specialized training focused on prolapse, incontinence and pelvic health disorders. Dr. Thompson is a general urologist at Urologic Consultants in Wyoming, Michigan and is certified by the American Board of Urology. She is also the co-director of the Continence and Pelvic Health Center of Urologic Consultants.

Terri Jackson Wade

Terri Jackson Wade is president & CEO and co-founder of Trōphikōs. Terri is also president & CEO of SJ Pharmaceuticals (SJP), which she joined in 2003 assuming leadership from her father. Prior to SJP & Trōphikōs, Terri was a management consultant for almost a decade with CSC Index and ICG Commerce, leading large scale projects with companies such as The Coca-Cola Company, Georgia-Pacific and Delta Airlines. Terri started her career as an equity research analyst with The Robinson-Humphrey Company in Atlanta. She received her MBA from The Wharton School of the University of Pennsylvania, and completed her undergraduate degree at the University of Alabama in the Honors Business Program.

Wendy J. Weiser

Wendy J. Weiser is a respected leader in association management for over two decades. Wendy is the founder & owner, president & CEO of WJ Weiser and Associates, Inc. (WEISER), founded in 1988 as a medical practice management firm, which advanced into association management in 1990. Today WEISER is a trusted partner to over 50 leading national and international medical, research and health care related organizations, and employs a full complement of 45 association staff professionals.

WEISER holds particular prominence in the management of medical specialty and subspecialty societies. All total, WEISER managed associations reach over 35,000 physician members in all specialties, representing \$35M in combined association revenue and, last year, yielded nearly \$7M in profits for its society clients. From her vast and varied experience, Wendy has aptly merged the profit business models with the non-profit world.

Prior to founding her company, Wendy began her professional career with Baxter Healthcare Corporation, Physical Therapy Division, where she received numerous promotions with increasing levels of significant responsibilities. At the young age of 25, Wendy was promoted to serve as the Division's Operations Manager, a finance position responsible for designing, overseeing and controlling the day-to-day business operations and practice management needs for 16 physical therapy centers located throughout the United States, which grew to over 50 centers during her employment. During that time, Wendy directed a large and multilayered professional staff efficiently and effectively, and earned high recognition internally and at the corporate headquarters.

Elizabeth A. Williams, MD

Dr. Williams is a urologist at Urology Consultants, Ltd., in St. Louis, Missouri. She received her bachelor's in both biology and psychology from St. Louis University in 2000 and continued her studies there, completing her doctor of medicine with distinction in research from the school of medicine in 2004. Dr. Williams completed an internship in general surgery in 2005 and a residency in urologic surgery in 2009 from Washington University School of Medicine, in St. Louis, and completed a fellowship in female urology and voiding dysfunction at Metropolitan Urologic Specialists, PA in Minneapolis, Minnesota in 2010. She holds memberships in several professional organizations

including the American Urological Association, International Continence Society, Endourologic Society, Sexual Medicine Society of North America and is a board member of the Society of Women in Urology.

Hadley M. Wood, MD, FACS

Hadley Wood, MD, FACS, is associate staff in Cleveland Clinic's Glickman Urological and Kidney Institute. She is also an associate professor at Cleveland Clinic Lerner College of Medicine. Dr. Wood completed her undergraduate degree at Duke University in Durham, North Carolina and later earned her medical degree from Johns Hopkins University School of Medicine in Baltimore, Maryland. She completed her residency in Urology at Cleveland Clinic Glickman Urology Institute in Cleveland. Her areas of expertise are in reconstructive urology, urological congenitalism and adolescent urology.

Dr. Wood is a member of the American Board of Urology, American College of Surgeons, American Urological Association, Society for Women in Urology, Ohio Urological Society, Society of Genitourinary Reconstructive Surgeons, Societe Internationale D'Urologie, Alpha Omega Alpha, Cleveland Clinic Women's' Professional Staff Association, and Cleveland Clinic's Women In Surgery, where she is also the Chair. In 2005, Dr. Wood won both the Bruce Hubbard Steward Award for Humanity in Medicine and the Elisabeth Pickett Research Award. In 2013 she was named Cleveland Clinic's Leading in Healthcare Fellow.

Claire C. Yang, MD

Claire C. Yang, MD, is the chief of urology at Harborview Medical Center in Seattle, Washington. She also has held several teaching positions and is currently a professor of urology and an adjunct professor of neurology at the University of Washington. Dr. Yang earned her undergraduate degree in biology from the University of Notre Dame in South Bend, Indiana and her medical degree from Vanderbilt University in Nashville, Tennessee. She completed a residency in both general surgery and urology at the Bowman Gray School of Medicine in Winston-Salem, North Carolina. She then completed a fellowship in neurourology at the University of Washington

Medical Center in Seattle, Washington.

Dr. Yang is a member of the American Urological Association, Society of Urodynamics, Female Pelvic Medicine and Urogenital Reconstruction and Society of Women in Urology, where she is also on the Board of Directors. Dr. Yang has been named a Top Physician in Urology by *Seattle Magazine*, *US News & World Report* since 2011.
